American Forestry Company

Framingham Centre, Mass.

*Rendering a New Type of Service Significant of a New Era in
American Horticulture*

THIS Company was founded a quarter century ago as the first privately owned and managed Forestry Service in America. Early in its existence, however, foreseeing the present widespread interest in the Landscaping Art, it rapidly broadened the field of its activities until today its service covers practically every phase of Ornamental Horticulture. To this end, it developed and maintained as a source of supply the large production nurseries and stores for equipment and accessories no doubt already familiar to you under the name of **Little Tree Farms**.

Its Landscape Service will plan the whole layout of your grounds, drives and paths for you, furnishing all necessary plans and instructions, design any type of garden you desire; design all decorative and protective plantings. It will carry out all the work involved in the above plans and designs, building all roads, rock work, gardens, etc., and making all plantings, furnishing if desired all plants and materials. It will maintain your property for you, caring for, renewing roads, lawns, gardens, etc.

The Forestry Service offers similarly adequate help to owners of wooded estates and those entrusted with the management of

public or private parks and forest reserves: It will act in advisory capacity, making surveys and working plans. It will carry out plans agreed upon furnishing all needed supplies if desired. It will care for, develop and improve existing forests, commercial or esthetic.

These Landscape and Forestry Services involve an organization of trained and efficient landscape and forest engineers, designers, gardeners, foremen and working crews, of whose spirit of co-operation, ability and efficiency this company is justly proud, and on which it bases its success. These services are fully detailed and described in our "Landscape and Forestry Service Handbook." (See back cover.)

In this, the Summer and Fall Catalog of **Little Tree Farms**—we offer you a wide selection of desirable plant varieties in such groups and at such prices as to make choice easy. We would also call your especial attention to the attractive and extensive collection of Garden Furniture, Tools and other Accessories.

We put this book in your hands with much good will. We trust when you have read it, The American Forestry Company may count you among its friends and the **Little Tree Farms** amongst its thousands of satisfied customers.

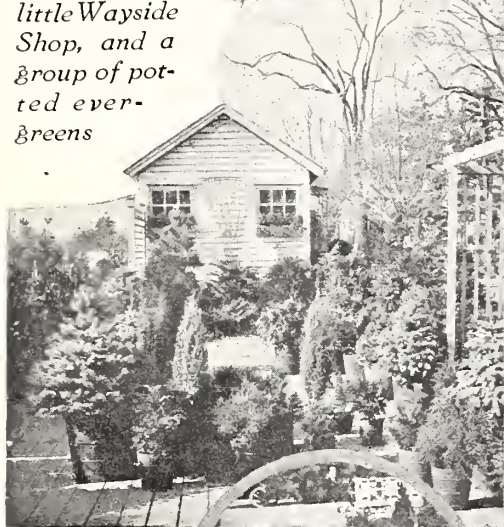

Look for this gay little sign at Pleasant Street Framingham Centre

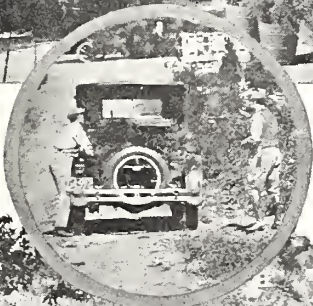

Broad drives and enticing paths through gardens bright with flowers invite you

The big mansion in white and green speaks friendly welcome. Below is the little Wayside Shop, and a group of potted ever-greens

Picked, packed and delivered

Little Tree Farms

THE views on this and the following page illustrate to a limited degree the extent and some of the activities of these great Nurseries and Stores.

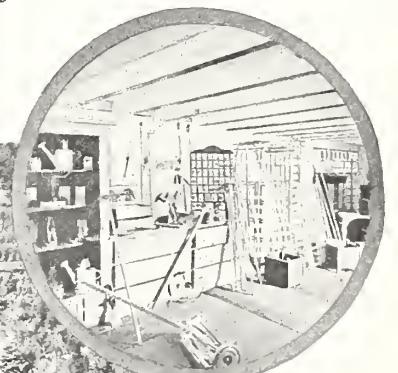

Here are grown for you, on hundreds of fertile acres, always under intensive cultivation, myriads of plants of many varieties, ready to step out at any time to help adorn your home environment. No better plants are grown anywhere. This holds good—size for size—grade for grade—whether you buy one plant or a thousand!

Farm No. 1 is a production nursery exclusively.

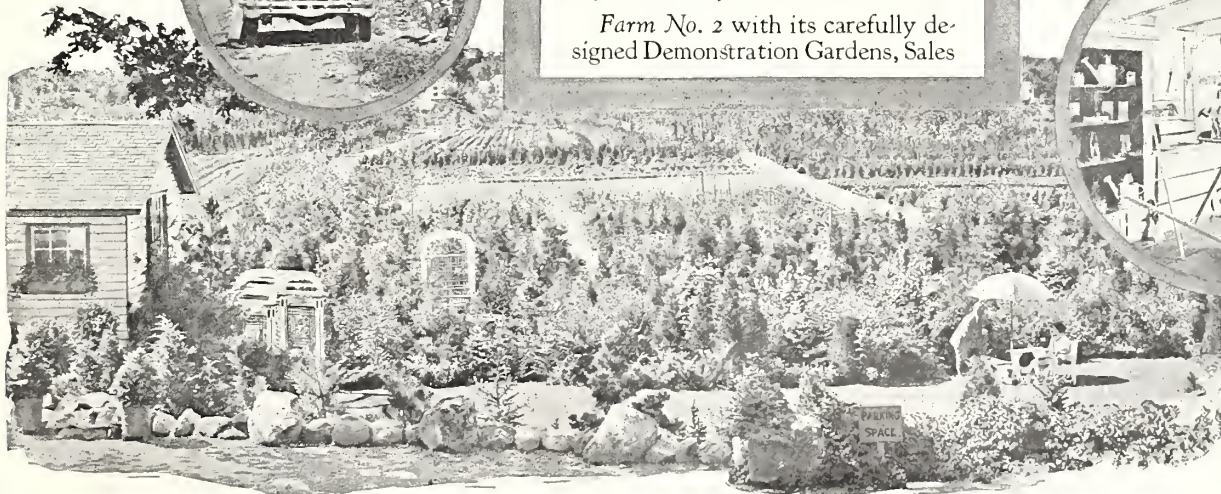

Farm No. 2 with its carefully designed Demonstration Gardens, Sales

Courteous salesmen are always "on deck" to answer questions and satisfy your wants

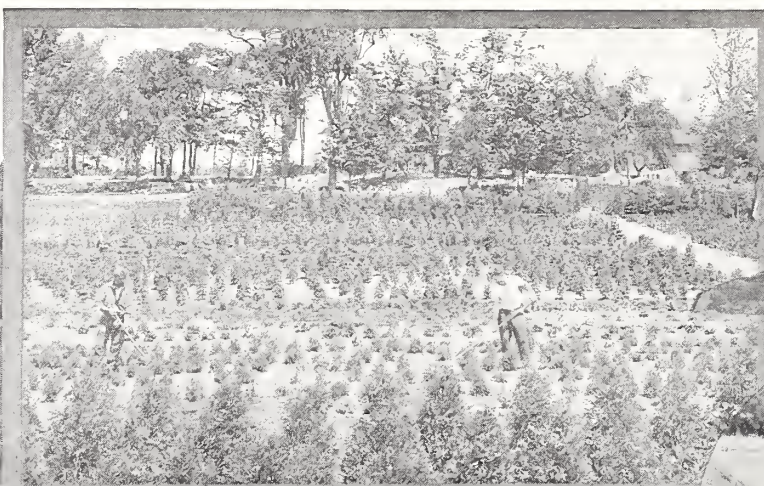

A corner in the Supply Shop. Full description of tools and accessories on pages 29, 30, 31 & 32

A partial view of the Demonstration Gardens and Sample Beds with growing fields in the distance

"The Man with the Hoe" is always a big factor at Little Tree Farms

Tom and Jerry—full of oats and ginger! It's always "Be-kind-to-animals Week" at Little Tree Farms

Putting the "babies" to bed

Grounds, and Supply Shop where you can buy tools, sprays, garden furniture, etc., is open to the public the year round.—It will well repay a visit.

Together they form under the management of the company a great Horticultural Supply Station for Metropolitan Boston and North-eastern United States generally.—Making new friends every year.

Write, telephone, or come to see us.—No obligation is incurred by doing so.

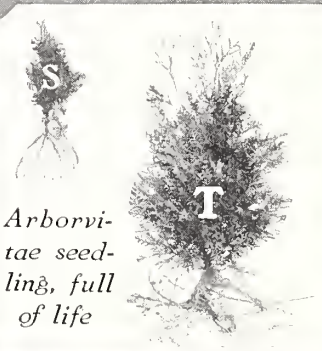

Potting Perennial plants

One at a time, 4 in. apart, 9 in. between rows

In with one load and out for another and maybe Gusto isn't proud of 'em

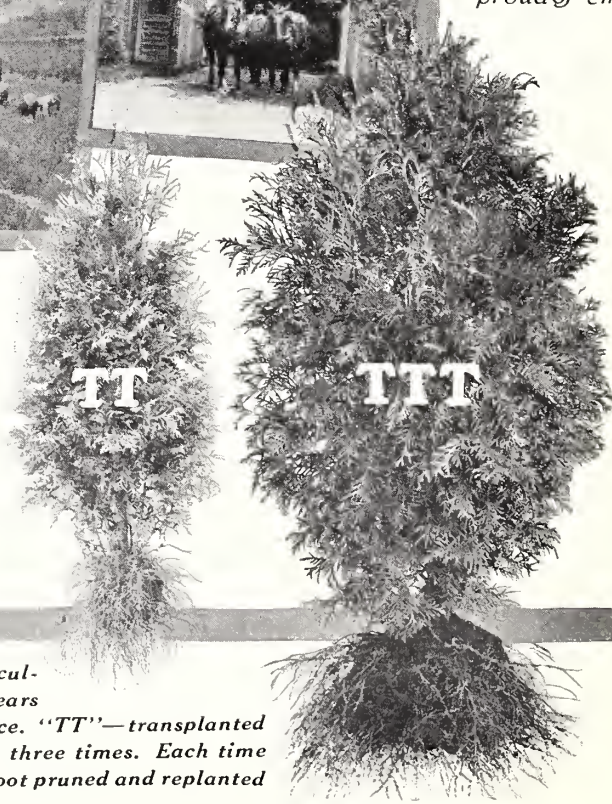

Arborvitae seedling, full of life

TT

TTT

Digging for shipment. See the big ball of fibrous roots and rich soil on the four-foot Arborvitae being burlapped in the foreground

Different stages in a plant's cultivation, each about two years apart. "T"—transplanted once. "TT"—transplanted twice. "TTT"—transplanted three times. Each time the plant is trimmed, dug up, root pruned and replanted in fresh soil.

EVERGREENS are the greatest factor in successful planting of home grounds. They combine in the highest degree, Beauty, Adaptability and Endurance. Shade and spicy aroma surround them in

Summer's heat; warmth and beauty in Winter's cold. And in storms of snow and ice they wrap themselves in mantles of incredible and gleaming purity, lending an air of quiet dignity to the home.

THE FIRS

THE Firs (*Abies*) are among the hardiest and most effective evergreens. They supply the elements of grace and luxuriant softness in a landscape planting, together with symmetry of structure and varied color tone.

The very best of the firs for ornamental and protective planting are here offered. It pays to buy the best.

Abies Balsamea

BALSAM FIR

This is the fragrant Fir of the North, the popular "Christmas Tree." The color is about the richest, darkest green of the evergreens, with a light green lining on the under side of the flat needles.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10
3 to 4 feet	\$5.00	\$40.00
2 to 3 feet	4.00	30.00

Height	10	100	1000
3 to 6 inches	\$3.00	\$20.00	\$175.00

For a glorious ornament to your lawn, alone as a specimen or in a group, plant this perfect Little Tree Farms White Fir 3 to 4 feet tall at \$8.50

Abies Concolor

WHITE FIR

The White Fir (often called Silver Fir), pictured above at the left, is especially notable for its lovely glaucous needles, its perfect form and graceful, erect habit of growth. As it is splendidly healthy and vigorous, it has long been a favorite with our customers for planting alone or in the foreground of groups. Our White Firs in the 3 to 4 foot grade are perfect as lawn specimens.

Little Tree Farms White Firs are all grown from the seed of Colorado trees, and are absolutely hardy; they can be planted successfully, even in shady, wet or exposed places. Use the †TTT plants for all ornamental purposes, and the †T grades alone or in combination with Douglas Fir, White Spruce and White Pine for field or woods planting.

DOUGLAS FIR

The glorious Douglas Fir, pictured in full growth. Use our 3 to 4 foot size

Pseudotsuga Douglasii DOUGLAS FIR

The beauty of Douglas Fir as a single lawn tree or in the foreground of a group is obvious from the pictures. Its soft, pointed needles are closely "woven" together to form an almost impenetrable mass of green against the skyline.

The utility of Douglas Fir is amply proven by its adaptability to varying soil and climatic conditions from the Atlantic to the Pacific. It is equally desirable as a lawn specimen and for large plantings, either ornamental or utilitarian; one of the most sought and valuable of all evergreens.

Douglas Fir makes a surpassingly good hedge; impenetrable, handsome and readily sheared. It bears sharpest cold, harshest

THREE MAGNIFICENT FIRS

- | | |
|---------------|-------------|
| 1 White Fir | 3 to 4 feet |
| 2 Douglas Fir | 2 to 3 feet |

Selected from the best in our nursery and shipped with their roots in burlap-tied earth. Splendid value.

Order by name and number with remittance

The half-grown Douglas Fir with its countless "tips" of spring growth

wind, poorest soil; it can thrive in partial shade or in full sunlight, and flourishes under shearing. In short, the Douglas Fir is superbly adapted for ornament, for protection and for practical uses.

For all extensive plantings, such as the continuous groups along your drive or the edge of your lawns; for planting at the edges of and under tall woods; and for plantings to break the wind or shut out unattractive views, Little Tree Farms "TTT" Douglas Firs give the maximum of service, beauty and economy. The strong plants of this grade will justify their cost by giving earlier results.

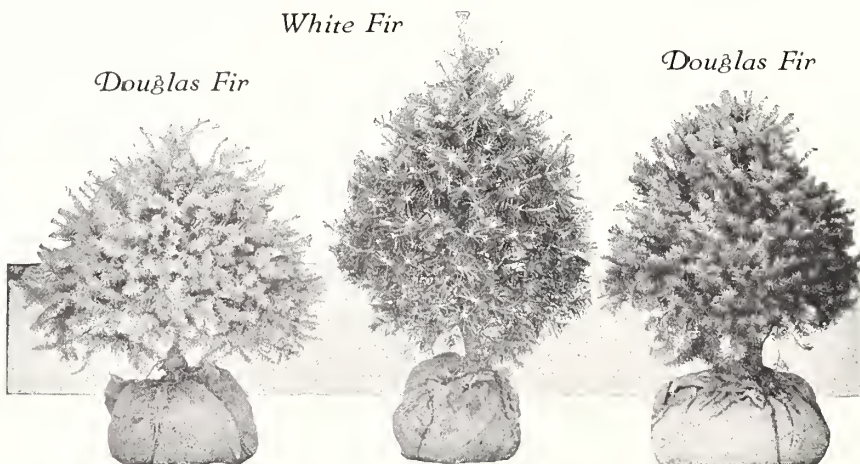

For large areas, underplantings, or for reforestation, we furnish transplants in good quality at very low prices.

White Fir

Douglas Fir

Douglas Fir

These are the three "magnificent" Firs offered above for only \$15.00. They are splendid plants for decorating the lawn. Note the wonderful quality of these three plants—with their large roots and compact mass of foliage

"Good Quality"

April 20, 1925.

"Received those 500 Douglas Fir Saturday. Thank you very much for such good quality."

"Prompt Service"

Old Lyme, Conn.,
June 22, 1926.

"The little White Fir and Douglas Fir you shipped to me June 2, 1926, arrived promptly and in good condition."

† The number of "T's" designate the number of times transplanted. See explanation at the bottom of Page 2.

A perfect use for Junipers. Plant our 6 to 8 foot Red Cedars for similar effect

THE CYPRESS

GRACEFUL, dense, semi-dwarf evergreen with soft, feathery foliage. Very useful for foundation and garden planting.

Chamaecyparis Pisifera SAWARA CYPRESS

This Cypress has feathery, light green foliage on gracefully drooping branches. Stands shearing; especially suitable for foundation planting.

THREE TIMES TRANSPLANTED *B & B		
Height	Each	10
15 to 18 inches	\$4.00	\$35.00

Chamaecyparis Pisifera Filifera THREAD CYPRESS

Hardy, oriental, semi-dwarf Cypress. It's deep green needles are slender and drooping.

THREE TIMES TRANSPLANTED *B & B

COLORADO AND BLUE COLORADO SPRUCE

The splendid characteristics of this magnificent Evergreen are shown in the specimen at the right. Note the heavy, rugged needles and growth

A tree of rare beauty. Each silvery needle catches and holds each ray of sunshine, making the "Blue" Spruce a "show" tree of first choice. The picture below shows exactly what we mean by a Blue Colorado Spruce

Picea Excelsa NORWAY SPRUCE

Norway Spruce is a sturdy, handsome evergreen that grows very rapidly. For this reason it is used extensively in windbreak plantings or as a quick-growing timber crop, as well as for purely decorative purposes. Its foliage is branched to the ground with dense, very dark green needles. When mature its branches droop gracefully to the ground, the lower branches sometimes lying on the ground.

For valuable commercial plantings and future Christmas trees, use Little Tree Farms †TT stock priced below.

18 to 24 in.	Selected for windowboxes and pots	Each \$3.50	10 \$30.00

Picea Pungens COLORADO SPRUCE

The Colorado Spruce has always been a feature at Little Tree Farms. All our plants of this species are grown from the seed of hardy trees of the high, cold regions of the Rocky Mountains—its native home. The color is perfection, ranging from a dark green to lighter more silvery tones. This is a regular "he-man's" tree, rugged in growth and bold in outline.

We cannot too highly recommend the †TTT Colorado Spruce for all ornamental plantings, single and grouped.

Picea Pungens Glauca

BLUE COLORADO SPRUCE

Blue Colorado Spruce is the bluest variant of the Colorado Spruce—the tree you mean when you ask for a "Blue" Spruce. The fine specimens priced on this page have a beautiful silvery blue color. It is said that Little Tree Farms has the largest and finest collection of "Blue" Spruces in the country.

These Blue Colorado Spruces are without a peer for use in ornamental pots, at doorways, in gardens as accents, and as lawn specimens. Little Tree Farms annually supplies thousands of these Spruces to customers who want the best.

Plant your "Blue" Spruce in dark, rich garden loam to procure and maintain the deepest blue color. It will be a constant joy in your garden.

Like sentinels in their native home, these Austrian Pines guard this old New England Homestead

***Pinus Cembra* SWISS STONE PINE**

A rare specimen evergreen with dense, deep green foliage, silvery underneath. Use for potting and ornamental planting in New England only.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10	100
12 to 18 inches	\$3.00	\$25.00	\$225.00
8 to 12 inches	2.50	20.00	175.00

***Pinus Flexilis* LIMBER PINE**

Limber Pine is rare and very exquisite. It is very erect with delicate needles which are the bluest of the Pines, very similar to the silvery tone of the White Fir. For New England only.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10
4 to 5 feet	\$6.00	\$50.00
3 to 4 feet	4.50	40.00
2 to 3 feet	3.50	30.00

***Pinus Nigra* AUSTRIAN PINE**

The Austrian Pine well pictured at the top of the page has a curious rugged aspect which makes a very artistic effect in any landscape scheme. It has an unusual spread of long branches, covered with dark green needle-foliage, stiff and resistant.

This is one of the Pines that will grow on poor, dry soil such as hilltops and sandy seaside places. It can endure the contact of sweeping wind and salt spray and it resists snow and ice pressure unusually well.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10	100
6 to 7 feet	\$12.00	\$110.00	
5 to 6 feet	10.00	90.00

THE PINES

THE Pines (*Pinus*) are the greatest glory of the evergreen region.

Little Tree Farms Pines are growing in fragrant beauty all over New England, out into the West and far down in the sunny South.

***Pinus Resinosa* RED PINE**

The enduring qualities of Red Pine are very like those of Austrian Pine; it withstands the harshest New England winters; it grows on poor soils and near the salt spray.

Our Red Pines have never been better; so for quick results on your lawn, in the garden, or along the drive, plant our 7 to 8 ft. and 6 to 7 ft. sizes. For commercial plantings use the transplants and seedlings which are priced below.

(Six Splendid Pines)

2 White Pine	4 to 5 feet tall
2 Limber Pine	3 to 4 feet tall
2 Swiss Stone Pine	12 to 18 inches tall

Each plant is first grade; all are shipped balled and burlapped. For New England only.

These six "silver-toned" Pines are especially well adapted for grouping on the lawn. The Swiss Stone Pine is low growing. Use it as an edging plant.

Price includes packing.

Order by name and number with remittance

* "B & B" (Balled and Burlapped) mean roots in a ball of native loam wrapped and tied in burlap.

Scotch Pines twice transplanted 18 to 24 in. The picture of this young Scotch Pine was taken very recently to illustrate the extra fine type of plants we are selling

Pinus Sylvestris

SCOTCH PINE

Scotch Pine shares the good reputation of Red Pine for use by the seaside or in exposure to driving winds. It is irregular in shape; its needles are very "glaucous" or blue green. A most artistic tree for the lawn. The Scotch Pine grows extremely fast and is very useful for reclaiming waste land.

For quick results use our †TTT first grade 3 to 4 feet tall. A neighboring garage or other objectionable views can be very effectively and quickly screened by using the Scotch Pine.

SCOTCH PINE SPECIAL

25 Scotch Pine 18 to 24 inches tall

These sturdy, Scotch Pines, illustrated above, grow unusually well near the sea, barren hillsides, and exposed places. Plant about 8 to 10 feet apart.

Our price includes packing

Order by name and number with remittance

A group of large White Pines growing at Little Tree Farms. Fine 10 to 12 foot specimens like the one below, only \$14.00 each

WHITE PINE

Pinus Strobus

WHITE PINE

The White Pine is rightly called the "King of Pines." It is one of the few best commercial trees for New England; it is splendid as a lawn specimen; it makes an excellent hedge; it is planted in gardens along paths and drives, as a screen.

Ever since the early youth of Little Tree Farms we have made White Pine the "first" specialty. We know how to select and start the seed, and we know how to grow and care for the "baby" seedlings in their journey to becoming full-foliaged specimens as illustrated at the left.

No property of size in New England is complete without its White Pine planting.

It is always in style, always in harmony, and always effective. At Little Tree Farms we highly favor White Pine.

THE ARBORVITAE

ARBORVITAE is chief among
the smaller sized evergreens,
which for generations have been
used about the house and garden.

Thuja Occidentalis AMERICAN ARBORVITAE

This is the one best all-round Arborvitae, really indispensable in ornamental planting of grounds or garden, alike in formal designs and in naturalistic plantings. It is a rounded spire, rather stouter than the Juniper, less pointed, and combining delightfully with the latter. Its foliage is carried in flattish sprays of dark green, so close together that the plant is one soft mass of color. The lightest of shearing or shaping brings the Arborvitae to the absolute symmetry suiting a formal garden. But left unsheared, it is still wonderfully formed, and quite as attractive for freer types of planting.

Its trim shape, fine color, varied
types of growth and ability to
stand shearing exceedingly well
make it a universal favorite.

Little Tree Farms Arborvitae are known
and planted all over the country. From
their magnificent roots to their shapely
full-foliaged tops, they are fitted for absolute success in every type of planting.

2 to 3 ft.	\$4.50	\$40.00	
18 to 24 in.	3.50	30.00	

Thuja Occidentalis Wareana
WARE (SIBERIAN) ARBORVITAE

Extremely hardy, constant dark green. Oval, stays compact without shearing.

THREE TIMES TRANSPLANTED *B & B			
Height	Each	10	100
18 to 24 in.	\$4.00	\$35.00	
12 to 18 in.	3.00	25.00	

Tsuga Canadensis **CANADA HEMLOCK**

The Canada Hemlock (often called American Hemlock) is one of the most beautiful evergreens. The quality of its gently drooping foliage, dark green and rich of tone, makes it a wonderful evergreen for planting close to the house.

Its ability to thrive in partial shade makes it particularly useful for planting in shady places.

Use the †TTT Little Tree Farms Hemlocks for ornamental groups; the †T for naturalistic plantings and extensive woods planting.

THREE TIMES TRANSPLANTED *B & B				
Height	Each	10	100	1000
2 to 3 ft.	\$4.50	\$40.00	\$375.00	
18 to 24 in.	3.50	32.50	\$300.00

9 to 12 in.	\$5.00	\$40.00	\$300.00
6 to 8 in.	4.00	30.00	200.00
4 to 6 in.	3.00	20.00	160.00

Prepare a circular bed by spading the soil; plant the taller evergreens in the center with the smaller evergreens around the edge

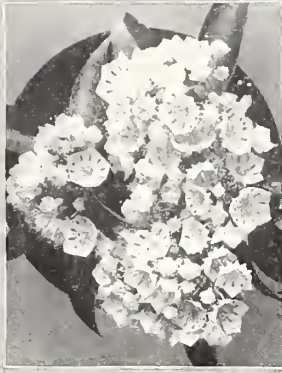

Two offers of number B-7 at the left will produce a similar effect on your lawn

† The number of "T's" designate the number of times transplanted. See explanation at the bottom of Page 2.

Rhododendrons along the house front

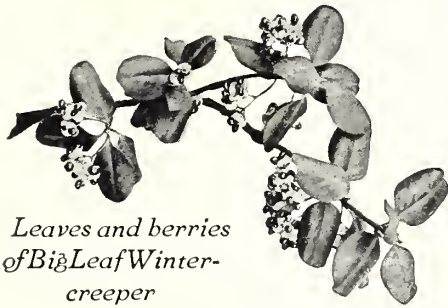

*Mountain
Laurel*

Naturalistic planting of Rhododendrons

EVERGREEN SHRUBS

EVERGREEN Shrubs are the hardiest flowering plants for ground cover and medium-height plantings in shady places and difficult spots. Their green or bronze leaves in winter and brilliant flowers in spring are beautiful.

*Leaves and berries
of Big Leaf Winter-
creeper*

***Euonymus Radicans* WINTERCREEPER**

The thick, dark green leaves and sturdy habit of growth make this an extremely delightful plant for use as a ground-cover, as a climbing vine, as an edging plant.

Grade	Each	10	100
4 Year	\$1.00	\$9.00	\$80.00
3 Year	.75	6.50	60.00

***Euonymus Radicans Carrieri* GLOSSY WINTERCREEPER**

This plant makes a very pretty bush, 3 to 4 feet high, if supported. It combines exceptionally well with evergreen trees.

Grade	Each	10	100
5 Year	\$1.50	\$12.50	\$100.00
4 Year	1.00	9.00	80.00

***Euonymus Radicans Variegata* VARIEGATED WINTERCREEPER**

Wintercreeper is better suited to New England climate than English ivy, being truly evergreen. This interesting variety has a white edge on a dark green leaf. See photograph of our quality stock above.

Height	Each	10
18 to 24 inches	\$3.00	\$25.00

Offer B-8 Price \$5.00

UNUSUALLY FINE WINTERCREEPERS

These are all first grade, selected from the finest in our nursery. Fine for house or garden wall.

*A perfect "carpet" of Japanese
Pachysandra*

*Glossy
Wintercreeper*

***Euonymus Radicans Vegeta* BIG LEAF WINTERCREEPER**

Larger leaves, nearly round and of a soft dark green, with bright red berries bordered with white, make this shrub a distinctly charming plant both Summer and Winter. It combines well with other evergreen trees and shrubs and makes a superb covering for stone walls.

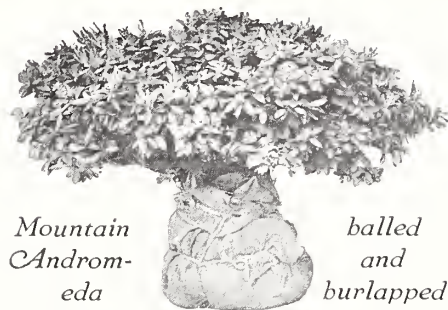

Grade	Each	10	100
4 Year	\$1.00	\$9.00	\$80.00
3 Year	.75	6.50	60.00

***Pachysandra Terminalis* JAPANESE PACHYSANDRA**

The thick, glossy evergreen leaves forming an impenetrable mat make the Japanese Pachysandra one of the best ground covers. Illustrated at the left.

Grade	10	100
3 Year	\$2.00	\$15.00

* "B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

*Mountain
Androm-
eda* *balled
and
burlapped*

Kalmia Latifolia**MOUNTAIN LAUREL**

Mountain Laurel is a favorite medium-sized evergreen shrub for drive, path and foundation plantings. Perfectly hardy on both wet and dry soils, it endures much shade. Large corymbs of beautiful rose-tinted flowers in June. See picture at top of page 13.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10	100
12 to 18 inches	\$2.50	\$20.00	\$175.00

Leucothoe Cataebsaei**DROOPING LEUCOTHOE**

Exquisite small drooping shrub. Lovely white flowers; purple leaves in winter.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10	100
12 to 18 inches	\$2.00	\$17.50	\$150.00

Pieris Floribunda**MOUNTAIN ANDROMEDA**

Extremely dainty and lovely and equally hardy. Long racemes of white bell-flowers, similar to the Lily-of-the-Valley. See picture above.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10	100
12 to 18 inches	\$4.00	\$35.00	\$325.00

Offer B-9 Price \$5.00
BEST GROUND COVER

10 Japanese Pachysandra 6 to 8 inches
10 Periwinkle 3-year

This excellent collection will make a thick carpet in shady places as for example underneath trees; also a good bank covering for retaining sliding soil.

Our price includes packing

Order by name and number with remittance

Rhododendron Carolinaum
CAROLINA RHODODENDRON

A very choice, early blooming, hardy Rhododendron, small and compact. Unusually lovely pink flowers, and pretty dark green leaves. Perfect for foundation plantings, paths, gardens and shady places.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10	100
15 to 18 inches	\$4.00	\$35.00	\$325.00

Rhododendron Catawbiense**CATAWBA RHODODENDRON**

Very hardy, very handsome, medium-sized, late flowering; large round clusters of rosy lavender flowers; rich dark green leaves; constant in winter. Invaluable for border, foundations, gardens and shady places.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10	100
18 to 24 inches	\$4.00	\$35.00	\$325.00

Vinca Minor**PERIWINKLE**

A ground-cover. Hardy and always green. It has lilac-blue flowers and will endure shade. Combines well with Japanese Pachysandra (Spurge).

Grade	Each	10	100
3 Year	\$0.35	\$3.00	\$25.00

Special Notice: Customers needing large quantities of Rosebay Rhododendron or of Great Laurel can be supplied with carload lots of collected or nursery grown plants if the inquiry is received well in advance of the planting season. Prices quoted upon request.

Rhododendron Maximum
ROSEBAY RHODODENDRON

The Rosebay is the climax of the Rhododendrons offered here, in size and hardiness. It forms a natural background for the smaller Carolina and Catawba. Has flat masses of rose-tinted white flowers. The glossy foliage endures frost.

This very handsome Rhododendron is much used for drives, and for underplanting pleasure woods, as its hardy type of beauty well fits a naturalistic planting. Delightful for the taller part of groups for foundation plantings, gardens and lawns.

THREE TIMES TRANSPLANTED *B & B

Height	Each	10	100
2 to 3 feet	\$4.00	\$35.00	\$325.00
18 to 24 inches	3.00	25.00	225.00

Yucca in full bloom

Yucca Filamentosa **YUCCA**

A charming clump of long-pointed leaves bearing very tall spikes of white bells in early summer. This evergreen shrub is very useful in the foreground of any evergreen bed-planting.

Grade	Each	10	100
3 Year	\$0.60	\$5.00	\$40.00

Little Tree Farms quality Diervilla.

Our shrubs are the kind you like to buy, full foliaged, well rooted

Exochorda Grandiflora PEARL BUSH

A tall, handsome shrub (7 to 10 feet) with dazzling white flowers in April, set off by very light green leaves.

TWICE TRANSPLANTED			
Height	Each	10	100
2 to 3 feet	\$0.85	\$7.50	\$70.00

Forsythia Suspensa Fortunei FORTUNE FORSYTHIA

Its yellow flowers appear before the leaves, the earliest note of spring. Grows to a height of eight feet. Very striking.

TWICE TRANSPLANTED			
Height	Each	10	100
3 to 4 feet	\$0.60	\$5.00	\$40.00
2 to 3 feet	.50	4.00	35.00

Forsythia Suspensa WEEPING FORSYTHIA

This shrub resembles the ordinary Forsythia, in its brilliant yellow flowers, but the branches droop gracefully.

TWICE TRANSPLANTED			
Height	Each	10	100
3 to 4 feet	\$0.60	\$5.00	\$40.00
2 to 3 feet	.50	4.00	35.00

Typical Hydrangea blossoms

Hamamelis Virginiana WITCH HAZEL

Witch Hazel shows its delicate cloud of blossoms while winter still lingers. A very charming, rare-looking, tall shrub.

TWICE TRANSPLANTED			
Height	Each	10	100
3 to 4 feet	\$0.75	\$5.50	\$60.00
2 to 3 feet	.60	5.50	50.00

Hydrangea Arborescens Grandiflora SNOWBALL HYDRANGEA

Pure white flowers in July and August. Very elegant appearance used against a dark background. The showy large heads of its flowers sometimes measure seven inches across. Hardy and used everywhere.

TWICE TRANSPLANTED			
Height	Each	10	100
2 to 3 feet	\$1.00	\$8.50	\$80.00
18 to 24 inches	.75	6.50	60.00

Winterberry—its crimson berries are joyful against the snow

Hydrangea Paniculata Grandiflora PEEGEE HYDRANGEA

This is the most popular of the Hydrangeas. In the fall its flowers turn an attractive red. See illustration at left. It can be used with great effect in blended planting.

TWICE TRANSPLANTED			
Height	Each	10	100
18 to 24 inches	\$0.75	\$6.50	\$60.00

Hypericum Aureum GOLDEN ST. JOHNSWORT

This unique low-growing shrub, bearing bright yellow blossoms from July to September, always attracts attention.

TWICE TRANSPLANTED			
Height	Each	10	100
2 to 3 feet	\$0.75	\$6.00	\$55.00

Ilex Verticillata WINTERBERRY

Delightful large shrub, whose dark twigs carry very red, round berries, lasting until mid-winter. See illustration above.

TWICE TRANSPLANTED			
Height	Each	10	100
18 to 24 inches	\$0.50	\$4.50	\$40.00

Kerria Japonica KERRIA

Yellow flowers in June; 4 to 8 feet.

TWICE TRANSPLANTED

Our three times transplanted Sugar Maples 10 to 12 ft. tall—at \$30.00 for 10—give quickest results on country road or village street

The Sugar Maples of Little Tree Farms go out to customers all over the country to decorate such noble lawns and drives. See the wonderful values in the lists below

For Today and Tomorrow—Plant a Tree

SHADE AND FLOWERING TREES

Steadfast Friends of Man that Give Much in Beauty and Protection

THE MAPLES

THE Maples are known and beloved everywhere. They are of fine shape and stature, graceful in habit and full-leaved.

New England's rugged climate plus Little Tree Farms splendid soil and care have created for you Maples of supreme quality.

Acer Dasycarpum SILVER MAPLE

A hardy, quick service tree. It grows so fast that it has great value when early shade is desired. Silver Maple has a spreading crown and gets its name from the "silver lining" of the underside of the leaves. Plant Little Tree Farms trees for quick results.

THREE TIMES TRANSPLANTED

Height	Each	10	100
12 to 14 feet	\$4.00	\$35.00	
10 to 12 feet	3.00	25.00	\$200.00

"Well Pleased"

Oley, Pa.

May 7, 1926.

"The trees arrived in good shape and planted, they look fine and to say I am well pleased is putting it mild."

Acer Platanoides NORWAY MAPLE

This very popular Maple has long been used both for street planting and for lawn shade. Its compact crown of close foliage is very symmetrical. It is hardy in respect to smoke, dust and drouth; it is immune to most insects; it grows rapidly and steadily. Little Tree Farms 10 to 12 foot trees at only \$3.50 each are wonderful. They grow fast.

THREE TIMES TRANSPLANTED

Height	Each	10
12 to 14 feet	\$4.00	\$37.50
10 to 12 feet	3.50	32.50

What could be more restful than a Norway Maple like this?

Acer Rubrum

RED MAPLE

Red or Scarlet Maple has brilliant fall color, and the spring effect is even finer, for the exquisite little blossoms of reddest rose come before the leaves turn red. There is hardly a more desirable tree for planting in private grounds, parks, or along roadsides. Little Tree Farms Maples have always been used with success by Park and Highway Commissioners.

THREE TIMES TRANSPLANTED

Height	Each	10	100
10 to 12 feet	\$3.50	\$30.00	\$275.00

4 to 6 feet	1.75	12.50	100.00

Acer Saccharum

SUGAR MAPLE

The Sugar Maple is really an extremely handsome shade tree—one of the handsomest. And our Little Tree Farms Sugar Maples are certainly of the best. The prices we are quoting offer a great opportunity to plant the best for little money.

Its perfect health and resistance to disease; its noble proportions and powerful structure, with its delightful quality of shade (ample but not obstructive) make it first choice for fine streets and avenues.

THREE TIMES TRANSPLANTED

A splendid example of White Ash

White Ash trees like the one below make splendid groves. Rapid growth, valuable timber, immune from most diseases. Order our Very Special White Ash Grove Offer

A real Red Oak Grove

WHITE ASH

Fraxinus Americana

WHITE ASH

This is a tree of much character and beauty, at all stages. Its trunk is particularly straight and smooth, its crown a magnificent oval. Its vigor and steady, rapid growth; its beauty and splendid shade value recommend it wherever you need a tall, clean-shaped tree in midsummer. These qualities make White Ash an exceptionally good street tree. And our low prices doubly recommend it for an ample planting. It is very long lived.

White Ash is much used for forest planting. This tree transforms a bare hill or field into a charming young forest.

Special Offer at the left. Can you find as good a tree 12 to 14 feet tall for less than \$2.00? See picture at the top left of the page

THE OAKS

THE Oaks are among the most majestic of deciduous trees. Their general build is powerful, branches rugged, wood valuable.

Quercus Coccinea

SCARLET OAK

Combine with Ash and Maples for marvelous color effects in the fall. The Scarlet Oak reaches a height of approximately 80 feet with gradually spreading branches forming a round-topped rather open head. It is especially valuable for its brilliant scarlet fall coloring.

THREE TIMES TRANSPLANTED

Height	Each	10

"Pleased"

Rochelle Park, N. J.

May 5, 1926

"Trees received quite safely and in good condition, and I am quite pleased with them. I will certainly recommend them, and you will no doubt receive additional orders. Later on I will send you orders for shrubbery."

* "B & B" (Balled and Burlapped) means roots in a ball of native loam wrapped and tied in burlap.

CA single Red Oak Lawn Specimen

Two Little Leaf Lindens, showing their delicate and shapely beauty

RED OAK

Quercus Rubra

RED OAK

The Red Oak is the one best all-round Oak,—beautiful, valuable, useful in all places. It grows and thrives everywhere for it is supremely healthy and vigorous by nature. Grows fast everywhere too.

Notice in the smaller picture at the top of the page the perfect symmetry of the Red Oak on the lawn. Its red is the purest, strongest red there is.

A grove planting of Red Oaks is an invaluable asset to any home grounds. The Red Oaks in the smaller picture at the top of page 21 show you just how such a grove would look on your lawn. For quick results plant our Offer B-16 at the right.

In many localities whole streets and avenues are lined with this majestic Oak. It is very long lived, hardy and practically immune to tree diseases.

Because of the many exceptional qualities of Red Oak we have grown a large quantity of very fine trees. We can recommend them very strongly to anyone who wishes to plant a single lawn tree or a large number for naturalistic work.

THREE TIMES TRANSPLANTED

IRIS AND PEONIES

GERMAN IRIS. The Iris are among the most delicately beautiful of the hardy Perennials. They rival the finest Orchids in color. The wide range of exquisite colors makes it possible to secure unusually charming effects in garden and border plantings.

Iris adapt themselves to almost any soil or situation but the choicest blooms are secured in a well drained soil in a sunny exposure. "S" signifies standards or upright petals, and "F" falls or drooping petals.

	Each	10
A. E. Kunderd. S, yellow bronze magenta tinged; F, magenta—red.	\$.50	\$4.00

Nothing takes the place of a garden of Hardy Perennials

HARDY PERENNIALS

HOW could we make a garden without them! Such variety of leaf and blossom, such glory of color and fragrance, first to greet us in the spring, last to yield to winter's snows. Here indeed beats the steadfast heart of the garden!

The varieties offered below give you a wide choice of popular and dependable perennials. The plants themselves are large, strong-rooted and ready to grow.

Name	Each	10	100
Achillea ptarmica <i>"The Pearl"</i> Pure white, double flowers all summer from June to September. This low-growing Perennial is a profuse bloomer with good foliage on strong stems. Splendid cut flower.	\$.30	\$2.50	\$17.00
Aconitum autumnale <i>"Autumn Monkshood"</i> From September until frost the large spikes of dark blue flowers are very effective in shady places. 4 ft.	\$.55	\$4.50	\$27.00
Althaea rosea <i>Hollyhock</i> This old garden favorite bears single flowers in assorted colors. An exceptionally good Perennial for the background.	\$.30	\$2.50	\$17.00
Althaea rosea <i>Double Hollyhock</i> Another favorite that is just as dependable with double flowers blooming in July and August. 5 to 6 ft.	\$.30	\$2.50	\$17.00
Alyssum saxatile compactum <i>Dwarf Goldentuft</i> The very large compact masses of golden yellow flowers are among the first to appear in spring. Exceptionally fine for rockeries and wherever a low-growing plant is needed.	\$.30	\$2.50	\$17.00
Anchusa italica <i>Italian Bugloss</i> A very desirable and hardy Perennial that blossoms from June to September. 3 to 4 ft. The large flowers are blue.	\$.30	\$2.50	\$17.00
Anemone japonica alba <i>Japanese Anemone</i> Pure white flowers with yellow centers. A good variety that blossoms in fall and will grow in partial shade. 2 to 3 ft.	\$.35	\$2.70	\$20.00

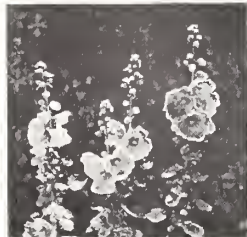

Name	Each	10	100
Anemone J. Queen Charlotte <i>Queen Charlotte</i> Abundant semi-double pink flowers, broad and perfectly formed. A strong grower. Excellent for cut flowers.	\$.35	\$2.70	\$20.00
Anemone J. Prince Heinrich <i>"Prince Heinrich"</i> This large double tip deep pink is a very profuse bloomer and will grow 2 to 3 feet tall.	\$.35	\$2.70	\$20.00
Aquilegia careulea <i>Colorado Columbine</i> The Columbines remain in bloom for a long season. Vigorous and long lived. They are much used in any hardy border or rockery. Will thrive in full sunlight or semi-shade. This variety is blue and white, blossoms from May to June. 2 ft.	\$.35	\$2.70	\$20.00
Aquilegia chrysantha <i>Golden Columbine</i> Numerous, fragrant. Yellow flowers from June to August.	\$.35	\$2.70	\$20.00
Aquilegia hybrids <i>Long Spurred Columbine</i> Scarlet and yellow petals with long spreading spurs. May.	\$.35	\$2.70	\$20.00
Arabis alba <i>Wallcress</i> This very fragrant white flower appears in early April. One of the very best for Rock Gardens and edging. 6 in.	\$.35	\$2.70	\$20.00
Asclepias tuberosa <i>Butterflyweed</i> A remarkably showy brilliant orange flower. Blossoming from July to September. 2 to 3 ft.	\$.40	\$3.40	\$26.00
Aster alpinus <i>Dwarf Alpine Aster</i> This very hardy blue flower is splendid for rockery and naturalizing. It blossoms from May to June and grows 6 to 8 in.	\$.30	\$2.50	\$17.00

Name	Each	10	100
Aster climax <i>Light Blue Aster</i> The large flower is a delicate lavender-blue which appears from August to October. 4 to 5 ft.	\$.35	\$2.70	\$20.00
Astilbe Juno <i>Juno Astilbe</i> The well branched flower spikes are violet rose. 3 ft.	\$.55	\$4.50	\$27.00
Astilbe Queen Alexandra <i>Queen Alexandra</i> This erect, deep pink flower which appears from June to July is very effective as an edging plant.	\$.55	\$4.50	\$27.00
Boltonia asteroides <i>White Boltonia</i> The Boltonias are hardy, showy plants with large single aster-like flowers. In bloom during the Summer and Autumn months. This variety is white and grows 5 to 6 feet tall.	\$.30	\$2.50	\$17.00
Boltonia latisquama <i>Violet Boltonia</i> A handsome lilac-purple flower that is splendid for cutting.	\$.30	\$2.50	\$17.00
Calimeris incisa <i>Starwort</i> In any garden this purple flower with its yellow center makes a big display in July and August. 1 to 2 ft.	\$.35	\$2.70	\$20.00
Campanula carpatica <i>Carpathian Bellflower</i> The Bellflowers are old favorites and every garden should have this indispensable flower. The flower of this variety is large and deep blue. It is compact and low-growing.	\$.35	\$2.70	\$20.00
Campanula carpatica alba <i>White Bellflower</i> Like the Carpathian Bellflower except flowers are white.	\$.35	\$2.70	\$20.00

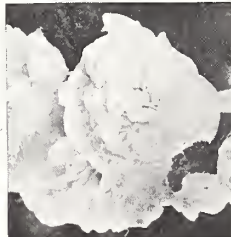

Dwarf Goldentuft

For spraying any kind of insecticide in liquid form. Made of finest brass, very durable. Use for all kinds of small garden work.

Price **\$2.25**

Postage **\$2.25**

**Auto Spray Pump No. 1**

Automatic spray for trees, vines and vegetables. Finest material and best of workmanship throughout. Works automatically for 6 to 15 minutes. Easily charged and operated.

Galvanized **\$6.40**
Brass **9.50**
Express Collect

**Feeney Dusting Gun (left)**

Very useful for spraying dry powders. Best quality materials and workmanship. Price **\$1.25**. Postage **\$1.15**.

**Little Tree Farms Lawn Grass Seed**

These mixtures have been especially prepared of the highest quality materials. They are noted for freedom from weeds and chaff and in a comparatively short time produce a perfect and permanent lawn, a rich deep green in color, and of a close, thickly matted texture. 75% of our "Shady Mixture" is Poa Trivialis, a very superior grass for shade, imported from Denmark. It is seldom found in other mixtures because of its high cost.

For sunny places **\$6.00**
Shady Mixture **.80**

Postage **\$1.10**

Stadlers Superior House Plant Food

Clean, odorless plant food. Use all year round and your plants will have new life and vigor. Fine for potted plants and cut flowers in water. Directions with package.

3 oz. size, **25c**.
Postage **5c**.
16 oz. size **\$1.00**.
Postage **15c**.

**Wilson's O. K. Plant Spray**

One of the best insecticides for roses, hardy perennials, evergreens, shrubs, vegetables, etc. It kills all insects and bugs, yet is harmless to plant life—ideal for small homes. One part is mixed with from 10 to 20 parts of water.

1/2 pint **\$0.40**
1 quart **1.00**
1 gallon **3.00**

Express Collect

**Humogerm**

A culture of bacteria for inoculating Garden Peas, Beans, and Sweet Peas. Directions with each package. Price **\$2.50**. Postage **\$1.10**

Stim-U-Plant

Rich in plant food. Scientific method of stimulating growing plants. Increases production and improves quality. Odorless and clean. Complete directions with every package.

100 tablets, **75c**.
1000 tablets, **\$3.50**
Postage **15c**.

Agricultural Lime

Good for sweetening acid or sour soils. Caution: Do not use near evergreens. Apply at the rate of 1 ton to the acre, or 100 pounds for every 2000 square feet. Price per 100 pounds **\$1.25**. Express Collect.

Pulverized Sheep Manure

Highly concentrated, light and dry. A good safe and sure fertilizer. Excellent for lawns, evergreens, trees, shrubs. Easy to use.

25 lb. bag **\$1.00**
50 lb. bag **1.75**
100 lb. bag **3.00**

Express Collect

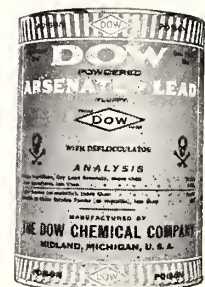

Black Leaf "40"

An excellent remedy for spraying sucking insects, spiders, aphids, etc., on evergreens, shade and fruit trees, vegetables, shrubs, and flowers. Also for Red Apple Bug, Green Apple Bug and Cherry Slug.

1 oz. **\$3.35** Postage **5c**.
1/2 lb. **1.25** Postage **15c**.

Bordow Mixture Powder

Prevents blight, mildew, rust, and other fungus diseases. Dilute in water. Prices per pound **\$1.35**. Postage **\$1.15**.

**Arsenate of Lead**

One of the best known remedies for controlling leaf-eating and chewing insects on shade or forest trees, fruit trees, and grapes. Will keep forever. Does not freeze and spoil. Powder form.
1 pound **\$4.45**
3 pounds **1.25**
Postage **15c**.

Little Tree Farms

AMERICAN FORESTRY COMPANY
FRAMINGHAM CENTRE, MASS.

Greatly appreciates the courtesy of its friends in suggesting the names of acquaintances who would be interested in its published matter, and takes pleasure in adding such addresses to its mailing list.

(OVER)

Visit Little Tree Farms at Framingham Centre, Mass.

THERE is always something of interest to see at our Show Grounds and Office Building, on Pleasant Street. In fair weather interested groups are studying the demonstration plantings at all hours of the day, selecting from them with the help of our landscape men materials and arrangements for their own grounds. In inclement weather the big white and green Home Office offers its hospitality. Photographs and colored plates of plants and plantings substitute for the demonstration grounds. A sun-room full of sample plants and a room devoted to garden tools and accessories make your decisions easier. Your car is safe in our ample parking spaces. You are always welcome.

At Little Tree Farms you will find a well-stocked show ground from which to select what you want. Also a pleasant landscape office where you may discuss your needs with a landscape man, and secure advice or plans. Every equipment for the convenience of customers.

To Reach Little Tree Farms

By Motor. Those visiting Little Tree Farms by motor, use main highways as indicated on the map given at the right. Finest State Roads in all directions.

By Electrics. At Park Square, Boston, take car marked "Worcester" leave car at Framingham Centre. A short walk out Pleasant Street brings you to Little Tree Farms.

By Train. Leave the train at Framingham Station and take motor bus to Framingham Centre—or taxi from Framingham to nursery.

(See Map Below)

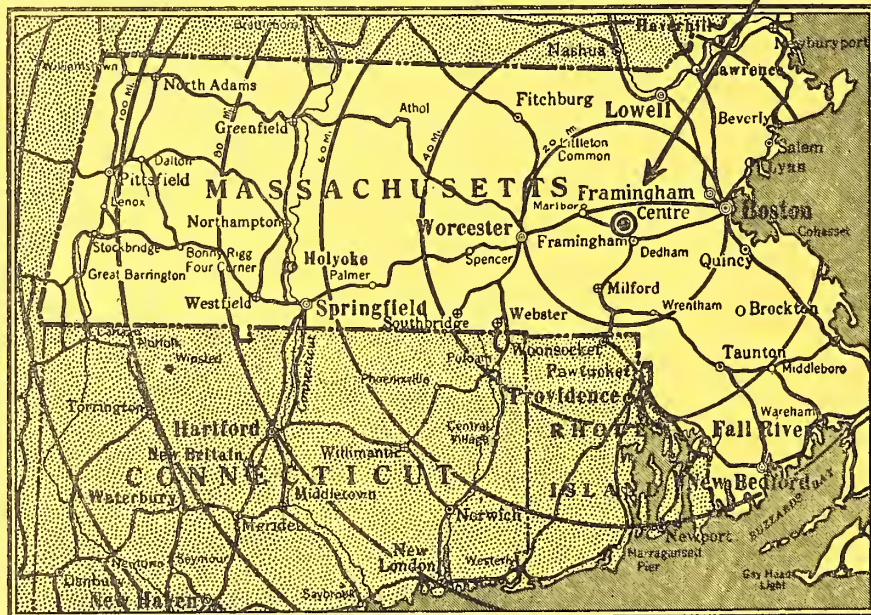

Shipping Seasons. Our improved methods allow safe shipping practically the year round, midwinter's cold marking the only pauses. Especially for customers within easy trucking distance there need be no hesitation in ordering at any time save deep winter.

The usual nursery shipping seasons are:

In Fall. About the middle of August for evergreens, continuing through November. The first of October for hardwoods and shrubs continuing until the ground freezes. Evergreens for pots, tubs, veranda boxes, etc., are shipped until Christmas.

In Spring. As soon as the frost leaves the ground (usually about the middle of March), continuing until June, for Evergreens, Deciduous Trees and Shrubs, Vines, and Perennials. Roses, Dahlia tubers, Gladioli bulbs, etc., shipped March until May.

Planting time is determined not by the state of vegetation where the planting is to be done, but by the condition of the stock to be planted. So long as the plants are dormant or in movable conditions they may safely be transplanted. We can ship to southern localities much later than would be supposed, because vegetation in Massachusetts is dormant much later.

Follow "LITTLE TREE" signs to reach the nursery on Pleasant Street, Framingham Centre.

Little Tree Farms Stock is

Dug fresh upon Order:

No stock kept in storage cellars.

Graded carefully and generously, usually giving extra for good measure. To avoid confusion, please order sizes as given in the catalog.

Packed properly in the moist air of modern packing cellars, according to species, time of year, and distance to travel.

Delivered promptly to transportation companies.

All Shipments are marked "RUSH" that you may receive your order as quickly as possible.

Special Information (Please Read)

Little Tree Farms is the trade name of the wholesale and retail nurseries of the American Forestry Company.

The Sales, Landscape and General Offices are at the retail nursery, Little Tree Farms, No. 2, on Pleasant Street, Framingham Centre, Mass., twenty-two miles west of Boston, and twenty miles east of Worcester on a State Road from Boston to Worcester and on the Boston and Worcester electrics. Framingham Centre is two miles north of Framingham, which is on the Boston and Albany and the New York, New Haven and Hartford Railroads.

When you Order Please Remember:

The more times a plant has been transplanted, root pruned, and longer cultivated in the nursery, the more vigorous and rapid growing it becomes, and the better adapted to difficult conditions. The more difficult the condition, or the quicker the result desired, the better is the grade you will need.

Deliveries. Express shipments normally arrive promptly and in good condition. For carload quantities and heavy shipments, however, Freight Shipment is best, unless the distance permits shipment by Motor Truck which is most strongly recommended. We ship by motor truck 150 miles, occasionally further. Prices for truck delivery given upon application.

We deliver free to transportation companies and our responsibility ceases upon such delivery. Shipments travel at customer's risk. We do not pay transportation charges.

There is no extra charge for packing retail orders, except when specifically noted. In comparing prices with other growers, please note this, as a considerable amount is thus saved our customers.

Nursery Stock marked "B & B" is shipped with

To order early for prompt shipment. This is important for successful planting. That shipping instructions should be written very plainly.

roots in a ball of earth securely tied in a burlap, at no additional charge.

Lower Rates on Quantity Orders. We sell 500 or more trees of the same size and kind at the thousand rate; between 50 and 500 at the hundred rate; less than 50 at the ten rate; less than 5 at the "each" rate.

Our Terms are Cash with Order. Post Office and Express Money Orders should be made on Framingham. Send cash in registered mail only. Charge accounts can be opened only if satisfactory references are furnished. C. O. D. orders must be accompanied by one-half cash.

Inspection Certificates of the United States, Department of Agriculture and the State of Massachusetts Agricultural Department accompany each shipment and assure healthy, clean stock.

Little Tree Farms Warranty. We warrant our stock true to label, properly packed, and in all respects fully up to Little Tree Farms standard of quality. We guarantee that, should the wrong species or grade or quantity be shipped through error, corrections will be made upon proof and notification within ten days from receipt of goods. We assume no liability for damage beyond the amount of the purchase price. It is humanly impossible to guarantee the growth or life of trees, shrubs or plants, since causes beyond our control may injure or kill them.

We make no Warranty or Guarantee as to Replacements.

In cases where, for the accommodation of the customer, we furnish labor or services in laying out grounds or in planting stock, we make every endeavor to furnish experienced, competent men. We make no further guarantee or warranty in this respect. None of our salesmen or other agents are authorized, in any manner, to waive or alter the above conditions.

Orders are accepted only on the above basis. Claims for delay or injury in transit should be taken up immediately with the transportation company. Write us at once for advice so that we may help you secure settlement.

How To Plant

Read carefully and save your money, effort and time. If you carry out these instructions your plants should grow and be a source of lasting pleasure.

PLANTING is a very simple operation, but the way you carry out the fundamentals means success or failure. Remember that all plants are living organisms. They need air, food and water. They receive their food and strength from the ground through their roots—the most delicate part of the plants. Be sure the roots are not damaged, or your plant is as good as dead before you start. Drying out of the roots is the thing to avoid. Little Tree Farms digs a ball of earth with its larger evergreens to prevent drying out. The roots on smaller plants are much easier to protect; they are safely shipped with their roots in wet packing material.

Little Tree Farms stock is properly packed for shipment by the most approved methods gained by many years of experience. Stock leaves us freshly dug and properly packed. Your plants should reach you in excellent condition.

After you have received good nursery stock there are three very important things that must be done to make your planting a success:

1. Proper soil preparation. 2. Correct placing of plants in the soil. 3. After care: Pruning, mulching, fertilizing, watering, etc.

These three points will be discussed for various types of plants in the instructions below.

EVERGREENS

Soil preparation. Evergreens as a whole prefer a sandy loam rich in humus (decayed vegetable matter) and porous enough to permit good drainage. Clay or heavy soils should be lightened by mixing in sand and well rotted manure containing a good deal of straw. Extremely sandy soils may be improved by adding some clay or heavy loam and well rotted manure. Wherever it is possible, prepare the soil, but if this can't be done, select the plant that will grow best under your conditions. (See lists on page 26, Year Book 36.)

If the plants are to be arranged in groups, as they often are around the foundation of a house, and the soil is fairly good, it is well to prepare the entire area to be planted. This is done by digging to a depth of 18 inches and thoroughly turning over the soil, removing roots, stones, and other objectionable matter. Very frequently we find that contractors use rubbish of all kinds for filling around the foundations of new houses. This rubbish, and especially plaster, is harmful to the plants and *must* be removed. If a soil is poor it is a wise investment to remove it and have good soil hauled in. Your plants will then have not only a much better chance to live, but will

trench, in which place the ball of earth *with burlap* and cover over with several inches of soil to exclude the air (figure 2). Soak the trench thoroughly afterward. Plants can be held a week or more this way *if placed where it is cool and away from sun and drying winds*. If the plants are bare rooted, dip the roots in a thick paste of mud and water (figure 3) and plant temporarily (called *heeling-in*) by plac-

Covering roots with soil, Figure 2

ing them closely together at an angle, their roots in a trench, and cover these with soil to exclude the air. Water thoroughly.

To plant "B & B" evergreens, dig a hole 2 or 3 times the size of the ball of earth. Refill the hole with good loam until it is just large enough to take the ball. Place the burlapped ball in the hole, cut the strings and carefully remove the burlap (figure 4) preserving the ball. Shovel in some good loam and pack firmly around the ball with a tamper, or your foot, as in (figure 5). Do this several times, until the hole is two-thirds full. Then fill the hole with water, allowing it to settle. Refill several times (figure 6). Now fill the hole with soil, leaving it saucer-shaped so that the water will collect around the plant and not run away.

Bare rooted plants are planted the same as above, except that the roots are to be spread out and downwards as much as possible.

After Care. *Water the ground thoroughly so that the water reaches the bottom roots. Merely sprinkling the foliage or soil is worse than no water at all.* Thorough watering twice a week is usually sufficient, but this depends on weather and other conditions. After watering stir the soil to a depth of one inch as this preserves the moisture.

In late fall it is well to cover the ground around the plants with a mulch of two or three inches of well rotted stable manure. Sheep manure may be used at the rate of one pound for each five square feet. The manure should be allowed to remain over the winter.

Where it is desired to keep plants small it is necessary to "root prune." This is done by pushing a spade its entire depth into the soil in a circle around the plant. The size of this circle should be determined by the spread of the branches. The finer foliated plants should be sheared and the coarser foliated plants, such as Pines and Spruces, pruned with a knife. This root pruning with the shearing makes it possible to keep plants low and compact for a long time. The best time to shear or prune is in June, but it may be done at any time.

SHADE AND FLOWERING TREES AND SHRUBS

Soil preparation. Same as for Evergreens.

Unpack promptly, and if not possible to plant immediately, "heel in" by placing the trees closely together, roots in a trench, and covering over the roots to exclude the air. See figure 2. This "heeling in" should be done in a cool place out of sun and drying winds. Water, if dry.

Planting. Dig a hole 2 or 3 times the size of the spread of the roots and refill with several inches of loose soil, making a cone-shaped mound, so that when the tree or shrub is put on top of it, the roots will have a

Dipping roots in mud, Figure 3

tendency to run down the side. Then cover the roots with several inches of soil, packing firmly with a tamper, or foot, as in figure 5. Fill hole two-thirds full. Fill hole several times with water, letting it settle each time. Now fill the remaining cavity with soil so that the hole is somewhat saucer shaped; water will have the tendency to collect around the plant and not run away.

If trees are large and are likely to move in wind, they should be braced with guy wires or supported by driving in a stout stake alongside of the stem, and the two tied with old hose or leather strap to prevent chafing. The tops of deciduous trees and shrubs should be pruned after planting. This means cutting out

Watering the roots, Figure 1

have food for years to come. A healthy plant is a joy, but a sickly plant is worse than none.

If it is difficult for you to get well rotted stable manure, sheep manure, which we can supply at reasonable prices, is a good substitute. Use about one-half pound of sheep manure for each square foot. *Never* use fresh manure, lime or chemical fertilizer.

Little Tree Farms quality evergreens are usually shipped "B & B" (roots in ball of burlap-tied earth).

Unpack promptly upon arrival. If balls of earth appear somewhat dry, stand the plants close together and water until balls have become thoroughly wet (figure 1). If planting cannot be done within a few hours, dig a

interfering branches and about one-third of the previous year's growth.

FOREST PLANTING

In planting large quantities of young trees, it is impractical to prepare the soil or to water them afterwards. One must depend on planting in moist soils at a suitable season and on the vigor of the plant and suitability to conditions. Little Tree Farms plants have great vitality and splendid roots and such are most sure to take care of themselves after proper planting.

ROSES

Soil preparation for roses is a very important and necessary factor in their success. Prepare the bed by digging to a depth of 18 inches. If the soil is good just work into it about one-third its bulk of well rotted manure (cow manure is preferred though horse manure is nearly as good). Have soil and manure thoroughly mixed. Roses prefer a heavy soil, though a light one will suffice if properly enriched each spring.

Roses require much moisture but will not stand "wet feet," or standing water. If water does not drain through the soil readily, some means of drainage is necessary.

Unpack promptly. Upon arrival take the rose plants out of the boxes and "heel in," placing the plants closely together in a slanting position in a trench and cover over roots well with soil to exclude air. Water thoroughly. Take out but a few plants at a time.

When planting, be sure the roots do not become dry. Be sure that the roots are well spread out and the soil is firmly packed around each plant to exclude the air. Plant about two inches deeper than "the crown." (This is where the first branches rise.) *This is very important.* Water thoroughly.

Plant Hybrid Perpetuals, 2½ to 3 feet apart; Hybrid Teas, 1½ to 2 feet apart; Ramblers, 5 to 6 feet; Rugosa Roses for hedge, 1½ feet; Wild roses, 2 feet apart.

After care. During the growing season keep a good mulch by stirring the top soil to a depth of an inch or so, and in dry weather water so that the bottom roots are reached.

Removing the burlap, Figure 4

If plants become infected with lice or aphids, spray with *Black Leaf Forty*; if attacked by the rose bug, use *Melrosine*. See page 63. Instructions for use come with each package.

Protect Hybrid Perpetuals and Hybrid Teas during the winter by heaping up soil around them so that 6 to 8 inches of the stems are buried.

Tops should be pruned back so that only 3 to 4 strong branches remain and only 4 to 6 "eyes" on each branch.

PERENNIALS

Soil preparation. Select a rich somewhat moist soil, in good light. Prepare the bed by digging to a depth of 18 inches, working in a liberal quantity of well rotted manure. Arrange the plants according to their heights

and color combinations. Plant enough kinds to provide continuous bloom from spring to fall. Avoid too striking color contrasts. Do not, as a rule, set plants singly, but rather five or more of a kind together. A much richer effect is gained this way and a longer season of bloom.

Planting. The average distance between plants is usually about a foot. The plants which grow three feet or more are put farther apart and the very low growing plants closer together. Spring and fall are good planting seasons. April and May, September and October are the best months.

After Care. Keep plants well mulched and watered during the summer. In the winter it

Stamping the plant, Figure 5

is well to cover the beds with about two inches of coarse straw. This is put on after the ground has frozen and prevents the alternate freezing and thawing which is detrimental to the plants. Fertilize the beds each spring by working well rotted manure or sheep manure into the surface soil.

PEONIES

Soil Preparation. To secure the best and biggest blooms from your Peonies the soil should be well prepared in advance of planting. Any good soil will do if the bed is dug to a depth of 18 inches and five or six inches of well rotted cow manure put on the bottom. This manure should be covered with four inches of soil to prevent direct contact of the manure and roots. Mix about 10 per cent of well rotted manure or leaf mould with the rest of the soil and plant the Peonies.

Planting. Peonies are best planted in early spring or during September and October.

Plant the "roots" about three inches under the surface and 2 to 3 feet apart. This gives them room to develop. Peonies are extremely hardy and need no protection after the first winter.

After Care. When the ground becomes workable in the spring dig the soil around the plants to a depth of an inch or two and work in some well rotted manure or bone meal taking care to keep the fertilizer away from the crown. Peonies like a lot of moisture and after the buds have formed an application of liquid manure once a week will produce larger and more brilliant blossoms. To get large flowers pick off the lateral buds and thus throw the strength into the top buds.

DAHLIAS

Soil Preparation. Dahlias like a porous soil with plenty of food material in it. Sunny or partially shaded locations are best. No matter what the soil is plants are benefitted if the soil is dug to the depth of a foot or more and well rotted cow or horse manure worked in. Be sure the soil and manure are well mixed.

Planting. When planting dig a hole six inches deep place the tuber flat (eye facing

upward) and cover with an inch or so of soil mixed with two handfuls of fertilizer. A mixture composed of good chemical potato fertilizer and ground bone meal in equal portions is best. Be sure no chemical fertilizer, or manure comes in direct contact with the tubers as this may burn them. After the plant is up about three feet hoe into the soil a handful of fertilizer every three weeks.

Dahlias should not be planted until all danger of frost is over.

After Care. Frequent cultivation is essential until the plants flower. Cultivation should then be stopped for at this time there is danger of cutting the new roots. When the first shoots of the Dahlias appear above ground there is some danger from cut-worms. An application of arsenate of lead is effective. (Directions for use are found on package.) Prices on page 63.

Plants should be staked to prevent tender stems from breaking. Place stakes when tuber is planted. To produce very large flowers it is necessary to disbud the plant. This is done by removing some or all of the buds except the terminal one. If the plant seems over-foliaged some of the foliage may be removed with a sharp knife.

Dahlias need a generous supply of water. Soak the ground thoroughly once a week and then mulch.

After the stems and leaves have burned brown, as they do when the first frost comes, it is time to dig the tubers for storage. Dig as you would potatoes, but be careful that you do not break them apart. Cut off the stems three inches above the tubers and then place the tubers in the sun for an hour or two. Tubers should then be packed up-side-down in boxes so that excess moisture may drain out of the hollow stem. Keep in a cool frost proof place.

A temperature of about 45 degrees is good.

Do not divide your tubers until spring. Then with a sharp knife remove each tuber by cutting it from the old stalk leaving that part of the stalk which has an eye or sprout connected with the tuber. The new plant starts its growth at this eye so a tuber without an eye is worthless.

Watering after planting, Figure 6

GLADIOLI

Soil Preparation. "Glads," like most plants respond best to a good loam soil with plenty of nourishment. You will be amply repaid in blossoms if you feed your plants.

Planting. Plant bulbs four inches deep in heavy soil and five to six inches deep in lighter soils. Thoroughly pulverize the soil working in well rotted stable manure. A little fertilizer or bone meal is also helpful.

To secure a succession of bloom plant a new lot of bulbs every ten days from the middle of April till the end of June.

After Care. In fall when stems have turned brown dig and store away in a cool place for six weeks. At this time tops should be cut off and the bulbs stored in a cool place, away from frost and drying heat, until spring.

Dames Rocket	27	Large Flowering Chrysanthemum	27	Scarlet Oak	21	Young's Sundrops	28
Daylily	27			Scotch Pine	10	Yucca	18

This Handbook —

— on the Landscape and Forestry Service of The American Forestry Company tells you clearly and simply how, by using these facilities, you may have your grounds, garden or woods brought to their highest degree of beauty and utility at the most reasonable outlay of time, money and trouble.

It shows you pictures of the drives we have built, the rockwork for which we are noted, the gardens we

have designed, the forests we have “made” and managed. It describes also our Maintenance Service—how we care for, renew, and improve old grounds, gardens and woods.

These services are equally available to owners of large estates, of small suburban or country homes, and of forest tracts.

If you wish a copy of this Handbook, please indicate your interest by letter or telephone.
